

MUHAMMAD DIKI WAHYUDI

Full-Stack Developer

Pekanbaru, Riau, Indonesia | muhammaddikiw02@gmail.com | +6289628398505 | [GitHub](#) | [LinkedIn](#) | [Portfolio](#)

PROFESSIONAL SUMMARY

Fresh Informatics Engineering graduate (GPA 3.76/4.00) with hands-on full-stack development experience across Spring Boot, Laravel, and Flask/Next.js ecosystems. Proven ability to independently design, build, and deploy production-oriented web and mobile systems end to end — from database schema and REST APIs to JWT authentication, real-time features via WebSocket, and containerized deployment with Docker. Validated system reliability through structured performance testing (JMeter) and delivered an NLP-based classification model reaching 70% accuracy. Open to relocation.

TECHNICAL SKILLS

Backend: Java, Spring Boot, Laravel, Flask, REST API, WebSocket

Frontend / Mobile: Next.js, Flutter, JavaScript

Database: PostgreSQL, MySQL

Authentication & Testing: JWT, Postman, JMeter

Languages: Java, PHP, Python, JavaScript

Tools & DevOps: Git, GitHub, Github Actions, Docker, cPanel

EXPERIENCE

Student Intern — Software Development & IT Support

Feb 2025 – May 2025

PT Perkebunan Nusantara IV Regional III (Persero)

- Supported the development and improvement of web-based applications within a state-owned enterprise.
- Diagnosed and resolved hardware, software, and technology-related issues to support daily operations.
- Provided technical support for application-related requirements and operational needs.

Core Team Member — Technical Trainer

Jun 2024 – Jul 2025

Riau DevOps (Community)

- Developed technical training materials and delivered sessions as a speaker for community learning activities.
- Assisted participants in troubleshooting technical challenges during workshops and training sessions.
- Contributed to application development projects from planning and implementation to technical assistance.

Laboratory Assistant

Aug 2023 – Jul 2024

Universitas Islam Negeri Sultan Syarif Kasim Riau

- Guided students through laboratory practicums and provided technical assistance during practical sessions.
- Maintained laboratory software and hardware to ensure optimal functionality.
- Managed and organized laboratory equipment and supported the preparation of practical activities.

PROJECTS

Sistem Klasifikasi Sentimen Berita PTPN IV Regional III (N2G) | Flask, Next.js, MySQL, IndoBERT, JMeter

- Built an IndoBERT-based news sentiment classification system for PTPN IV's PR team, reaching 70% classification accuracy on labeled news data.
- Implemented automated news scraping integrated end-to-end with the classification pipeline and a MySQL-backed monitoring dashboard.
- Validated system performance with JMeter load testing across 11 endpoints (330 samples total, 0% error rate) — core read endpoints (news listing, sentiment analytics) averaged 14–24ms response time, while the scraping endpoint, the heaviest operation, averaged ~5.1s under load.

Kopling (Kopi Keliling) | Spring Boot, PostgreSQL, WebSocket, Flutter

- Built a location-based mobile marketplace connecting coffee sellers and buyers, with Spring Boot serving as the backend.
- Implemented JWT-based authentication/authorization and real-time seller location tracking plus in-app communication via WebSocket.
- Designed the PostgreSQL schema for users, orders, and seller locations.

Commitin.id — Interactive Git Learning Platform | Spring Boot, JavaScript, MySQL

- Built a Git learning platform with structured modules, commands, and case studies.

- Developed backend features using Spring Boot, Thymeleaf, and MySQL; implemented a simulated Git terminal with JavaScript, xterm.js, isomorphic-git, and a virtual file system.

Sistem Informasi Bimbel Setia Aqidah / *Laravel, MySQL*

- Developed a tutoring management system covering student/teacher management, class scheduling, and attendance tracking with Laravel and MySQL.

Sistem Informasi Puskesmas Rokan IV Koto / *Laravel, MySQL*

- Developed a healthcare information system covering patient management, doctor scheduling, medical records, and an administrative dashboard.

PPDB MA Al-Muhsinin — Student Admission System / *Laravel, MySQL*

- Developed an online student admission system supporting registration, document submission, and applicant verification.

Web Desa Sintong Pusaka / *Laravel, MySQL*

- Developed and deployed a village information system (news, government structure, community services) using Laravel and MySQL, including hosting management via cPanel.

EDUCATION

Bachelor of Engineering, Informatics Engineering — Aug 2022 – Sep 2026

Universitas Islam Negeri Sultan Syarif Kasim Riau

- Cumulative GPA: 3.61 / 4.00. Specialization: Fullstack Development, Backend Development, and NLP.
